TARIFF TEAL 100-A Supplement 6

ITEM: 190C

FUEL SURCHARGE

All shipments subject to provisions governed by this tariff are subject to a fuel surcharge applied to the net line haul charges. The fuel surcharge will be shown as a separate charge on freight bills.

The surcharge is based upon the average self-service price per gallon of diesel fuel as calculated by the Energy Information Agency. Changes will become effective Wednesday of each week, and will be based upon the average self-service price per gallon for the previous week. The average price will be rounded to the nearest whole cent by dropping fractions of less than one-half cent and increasing to the next whole cent those fractions of one-half cent or greater.

U.S. Department of Energy's

Central Atlantic States
