All shipments subject to provisions governed by this tariff are subject to a fuel surcharge applied to the net line haul charges. Changes will become effective Wednesday of each week, and will be based upon the average self-service price per gallon for the previous week. The average price will be rounded to the nearest whole cent by dropping fractions of less than one-half cent and increasing to the next whole cent those fractions of one-half cent or greater.

ITEM 340

METHOD OF AMENDING AND OR CANCELLING TARIFFS AND ITEMS WITHIN ANY TEAL TARIFF

As a TEAL Tariff (100-200-400-500) is adjusted, the supplements will be numbered, starting at one (1). * Items that are amended within the tariff will be distinguished by a letter suffix in alphabetical sequence beginning with the letter A. ** Any new item will be processed under a new number in its entirety. *** As the tariff is supplemented, numbered items with letter suffixes will cancel correspondingly numbered items in the original tariff or in a prior supplement, except as otherwise specifically indicated. ****

- * Example: When an item or items are amended within a tariff, the supplement noting the changes will be numbered as Supplement 1, Supplement 2, etc...
- ** Example: Original Item 123, when amended in a supplement, would be noted as 123-A(-Z). The supplement number will be noted next to the original Item i.e. Item 123 (see Supplement 1).
- *** Example: A new rule for a special service not noted in a present item would receive its own Item Number i.e. 789 if not previously used)
- **** Example: Item 123-A cancels Item 123, and Item 456-C cancels Item 456-B in a prior supplement.

Note: Supplements may be added to any TEAL Tariff, to update Items and/or add or omit details regarding any specific detail defined by any Item.

Note: When an original TEAL TARIFF is reissued, it would be noted as a new tariff, i.e. TEAL 100 will be noted as TEAL 100-A.

RATES AND CHARGES

Eligible shipments will be subject to a minimum charge to be determined as follows:

(Continued on following page)

TARIFF TEAL 100B

Item 615 (continued)

CONDITIONS

Density is based on the total cubic feet of all articles or pieces in the shipment. Density is determined as follows:

- (A) The cubage of loose articles, pieces or packaged articles of a rectangular, elliptical or square shape on one plane shall be determined by depth in inches, including all projections, and dividing the total by 1,728 cubic inches (one cubic foot), the density shall be the result of the division of the weight of the article piece or package by the ascertained cubic feet.
- (B) To determine the density of a cylindrical shaped article or any article other than a square, elliptical or rectangular-shaped article in a single plane, square the greatest dimension on the cylindrical or other than square, elliptical or rectangular plane (multiply the dimension by itself) and multiply that result by height or length. If result is in cubic inches, divide by 1,728 cubic inches (one cubic foot). The density shall be the result of the division of the weight of the article by the ascertained cubic feet.
- (C) Freight bill information: When this item has application, the carrier's freight bill will indicate both the actual weight and the calculated weight upon which the minimum charge is assessed.
- (D) Maximum Charge: On trailers 29 feet in length or greater the charge for a shipment subject to the provisions of this item shall not be greater than the charge for capacity loads (Item 390), nor greater than the truckload charge per vehicle used. The overflow portion of a shipment which is charged for as a separate shipment will be subject to the provisions of this item.
- (E) The provisions of this item are not applicable in connection with shipments subject to:
 - 1) Truckload rates or charges.
 - 2) Rates which apply per vehicle used.
 - 3) Capacity load provisions (Item 390).
 - 4) Exclusive use of vehicle provisions (Item 470).
- (F) Packaging: See Item 660 and Item 661 Paragraph 1.

ITEM 640

MIXED SHIPMENTS - LTL (Exception to Sections 2 and 8, NMFC Item 640)

SECTION 2. Single LTL shipments subject to two or more rates when differently rated articles are separately packaged, will be charged at the actual or authorized estimated weight, and at the rate applicable to each, subject to the applicable minimum charge. When the billed weight is higher than the actual weight, the resulting deficit weight will be charged for at the rate applicable to the lowest rated article contained in the shipment.

SECTION 8. Except as otherwise provided in tariffs governed hereby, the following provisions will apply on mixed shipments of LTL freight.

- (a) When rates provide for a maximum percentage of an article that may be included in the mixed shipment and a greater percentage is included, the rates will apply on the restricted article, up to the allowable percentage.
- (b) When there are two or more differently rated articles subject to the same maximum percentage restriction, the allowable percentage shall consist of the lowest rated article or articles necessary to make up the percentage.
- (c) When percentage limitations are separately provided on different articles, rates will apply on each article up to and including the allowable percentage.
- (d) The excess over the allowable percentage for any article is to be rated as a separate shipment.

ITEM 645

MIXED SHIPMENTS - TL (Exceptions to NMFC Item 645)

Unless otherwise provided, when a number of articles for which the same or different classes or rates are provided when in straight truckload quantities, are shipped at one time by one consignor from one point of origin to one consignee at one destination, on one Bill of Lading as a mixed truckload shipment, the following will apply:

(Continued on following page)

For explanation of Abbreviations and Reference Marks, see last page of Tariff.

TARIFF TEAL 100B

Item 645 (continued)

SECTION 1. The articles will be charged at the actual or authorized estimated weight and at the straight truckload class or commodity rate (Not "Specific Mixture", "All Freight", "Freight, All Kinds" or "All Commodity" or similarly designated rate or class), applicable to each article except as provided in NMFC Items 310 and 640. The truckload minimum weight will be the highest provided for any article in the mixed truckload shipment, and any deficit in the truckload minimum weight will be charged for at the lowest truckload rate applicable on any article in the mixed truckload shipment.

SECTION 2. Subject to the provisions of Section 1, when the aggregate charge on the shipment is made lower by considering the articles as if they were divided into two or more separate truckload shipments, the shipment will be charged for accordingly.

SECTION 3. Subject to the provisions of Section 1, when the aggregate charge on the entire shipment is less on the basis of truckload rate and truckload minimum weight (or actual or authorized estimated weight if in excess of the truckload minimum weight) for one or more of the articles and on basis of the less-than-truckload rate or rates (NI) on the actual or authorized estimated weight of the other article or articles, the shipment will be charged for accordingly. On the articles included in truckload shipments on which less-than-truckload rates are applied truckload package requirements will apply not subject to increased charges provided in NMFC Item 687. Charges on articles in packages shall not be higher than on the same articles loose.

SECTION 4. If a lower charge results under the application of Section 1 of this item than under the provisions for a specific truckload mixture, such lower charge will apply.

SECTION 5 . Where different truckload rates and minimum weights are provided on the same articles included in a mixed truckload shipment, the applicable charge will be the lowest that can be computed by the use of the various rates and their accompanying minimum weights for those articles. On class rate applications, only a single truckload line in the class rate scale will apply for articles in the mixture subject to class rates. TL class rates will not alternate unless all lower rates and all higher minimum weights associated therewith, produce lower charges for the entire shipment.

SECTION 6. The provisions of this item will not apply to articles, the transportation of which at the same time in the same vehicle, is prohibited by federal, state or municipal regulations.

SECTION 7. This item will not apply on:

- (A) Articles on which truckload ratings or rates are NOT APPLICABLE except for the purpose of making up deficit in the required truckload minimum weight as provided in Section 1 of this item.
- (B) Building Woodwork (house trim); Cement, hydraulic, masonry, mortar, natural or portland, Lime, common, including magnesium lime, hydrated, quick or slaked; Livestock.
- (C) On shipments containing Class A and B Explosives. Apply provisions of NMFC Item 645.

NOTE: (N1) - Where a less-than-truckload rate is dependent upon the weight of the shipment, apply the less-than-truckload rate which would be applicable on a less-than-truckload shipment equaling the total weight of the mixed truckload shipment.
